Abstract: Pursuant to section 313 of EPCRA, certain facilities that manufacture, process, or otherwise use specified toxic chemicals in amounts above reporting threshold levels must submit annually to EPA and to designated State or Tribal officials toxic chemical release forms containing information specified by EPA. 42 U.S.C. 11023. In addition, pursuant to section 6607 of the Pollution Prevention Act (PPA), facilities reporting under section 313 of EPCRA must also report pollution prevention and waste management data, including recycling information, for such chemicals. 42 U.S.C. 13106. EPA compiles and stores these reports in a publicly accessible database known as the Toxics Release Inventory (TRI).

Form Numbers: 9350-1, 9350-2, 9350-3.

Respondents/affected entities: Private businesses.

Respondent's obligation to respond: Mandatory per 40 CFR part 372.

Estimated number of respondents: 23,116 (total).

Frequency of response: Annual.

Total estimated burden: 3,555,998 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$183,418,377 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 33,262 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to the lifting of the Administrative Stay of hydrogen sulfide reporting requirements, the addition of ortho-nitrotoluene to the TRI chemical list, and an increase in the number of facilities reporting to TRI.
